AUD Income Plus Strategy Performance

Update as of: 31 October 2007

The Income Plus Strategy is based on a proprietary trading model that seeks to offer income and the potential for capital appreciation through exposure to global equity markets. Each year, the Strategy selects a portfolio of 30 high yielding stocks from the Dow Jones Global Titans 50SM (DJGT) Index. Further yield enhancement is achieved by writing quarterly covered call options on each of the stocks within the Strategy. The call option overwriting is intended to help the Strategy outperform a direct investment in the underlying portfolio of stocks in all but strong bull market scenarios.

(v) Strategy and BP monthly change are estimates and are calculated using beginning and end of month Citigroup bid prices and allocations to the Strategy. (vi) The Dynamic Portfolio Reference level is the indicative value of the Net Portfolio Unit NAV as at the respective month end and has been derived from proprietary models that take into consideration estimates about relevant present and future market conditions as well as the size and liquidity of the position and any related actual or potential hedging transactions. It is for indicative purposes only and subject to change. (vii) If the Gap measure rises above 25% (of the YIELDS Value), an "up-leverage" event will occur; a fall of the Gap measure below 15% would lead to a "de-leverage" event. Total Return & Distribution since Issue Date ⁽ⁱⁱ⁾

Gap History ^(vii)

(i) Bid Price is the ASX market bid price of YIELDS (ASX code: YLDSO1) as at the respective month end. This price reflects the highest market bid in the security as at the close of trading. In the event of no higher bids this price may represent Citigroup's market bid price for YIELDS. On the Issue Date the initial value of YIELDS was AUD 9.64 per unit. (ii) Price return and total return since Issue Date are calculated as a % change in price versus the YIELDS Value at the beginning of the reference period net of any upfront fee and other ongoing fees. Total return figures include distribution paid and assume no reinvestment over life. (iii) YIELDS Distribution % is calculated as the total distribution declared per unit during the period as a % of the YIELDS ASX bid price at the beginning of the period. % figures are not annualised. (iv) This is the YIELDS amount collected to date per YIELDS unit for the next quarterly distribution. This amount is an estimate as of month end, based on available information at the time and assumes the current allocation remaining constant. It is for indication only and may be subject to change.
